

Attachment 1: Questionnaire with topic catalogue

Thank you very much for your participation and **valuable support!**

To comprehensively capture the general practitioners' perspective on their experiences in doctor-patient communication within this study, every response is essential. Only in this way can we determine which topics are relevant for inclusion in communication training courses.

Completing the questionnaire will take approximately 10 to 15 minutes.

We kindly request sincere and **prompt responses to the questions**, as there are no right or wrong answers. We are particularly interested in **your personal experiences in general medical practice**. By completing the questionnaire, you are making a significant contribution to improving medical education.

General Notes:

To keep the questionnaire as concise as possible, the masculine form is used throughout. However, all genders are equally implied. The questionnaire number is solely for follow-up purposes, such as reminding participants about returning the form, if necessary. Your data will be stored and analysed electronically without any direct reference to your name.

(A) Personal Experiences in Doctor-Patient Communication

Below you will find a list of various topics related to doctor-patient communication, accompanied by some examples.

Please indicate how **challenging** ("very easy" to "very difficult"), **frequent** ("very rare" to "very often"), and **significant** ("unimportant" to "very important") each topic is in your daily professional communication with patients. Additionally, please assess the **relevance** of each topic for **medical education** ("irrelevant" to "relevant").
