### *Grey literature table*

General scoping searches were carried out on the Google.com search engine to gain an initial idea of terminology and likely key terms. Reviewing literature in the area (retrieved from the Epistemonikos and Cochrane databases) also helped build up our search vocabulary. Initial search terms used included combinations of ‘single-use device’, ‘SUD’, ‘SUMD’, and ‘single-use medical device’, together with language around reprocessing and reuse. Further searches were carried out using the websites of relevant bodies (see *Table S6*).
